# Evolution of application monitoring

@zakknill  
<https://zknill.io>

ATTEST

A modern office interior with large arched windows, a yellow sofa, and people working at computers. The scene is bright and professional, with a focus on collaboration and productivity.

Targeting

# what vs. why

Symptom	Cause
Responses have 500 and 404 status	DB connection pool exhausted
Images aren't loading	CDN has misconfigured ACLs
Node is unresponsive	App leaking file descriptors
Node has run out of disk space	Docker images are not pruned

# Monitoring blackbox vs. whitebox

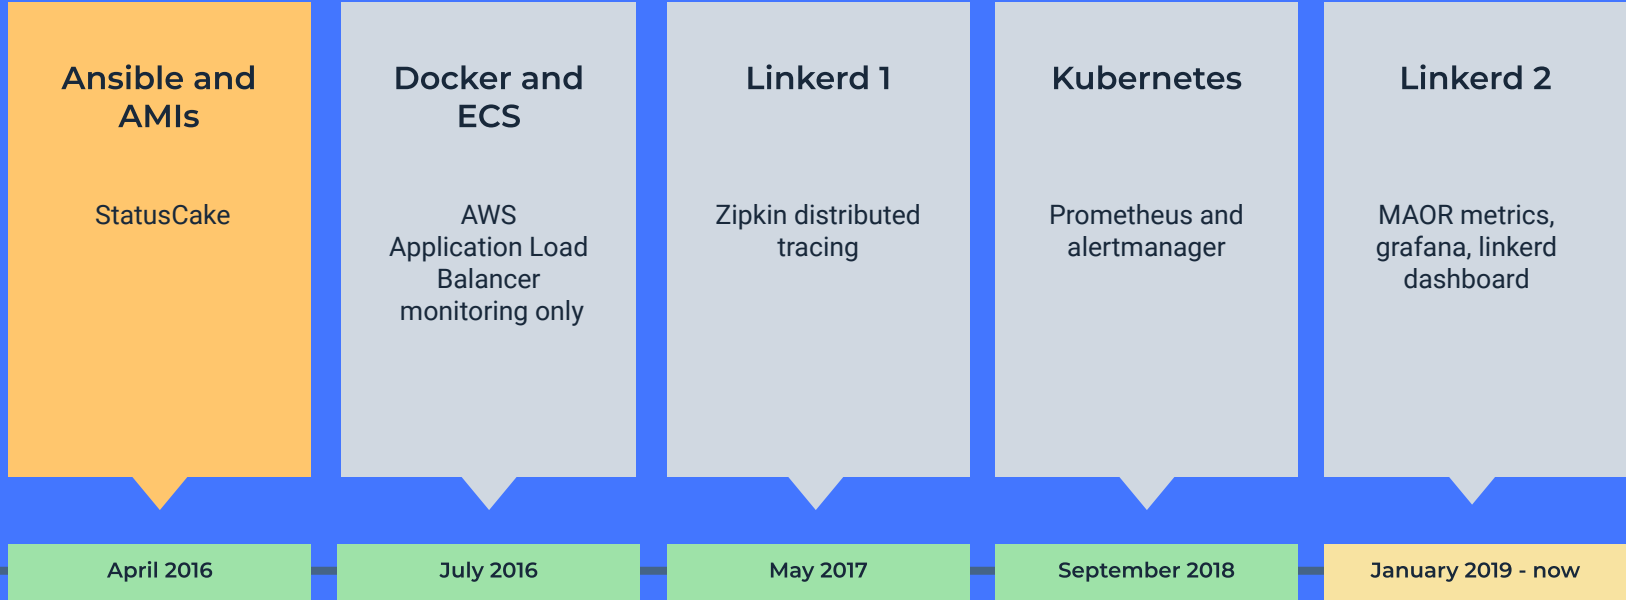

*“Testing  
externally visible  
behaviour as user  
would see it.”*

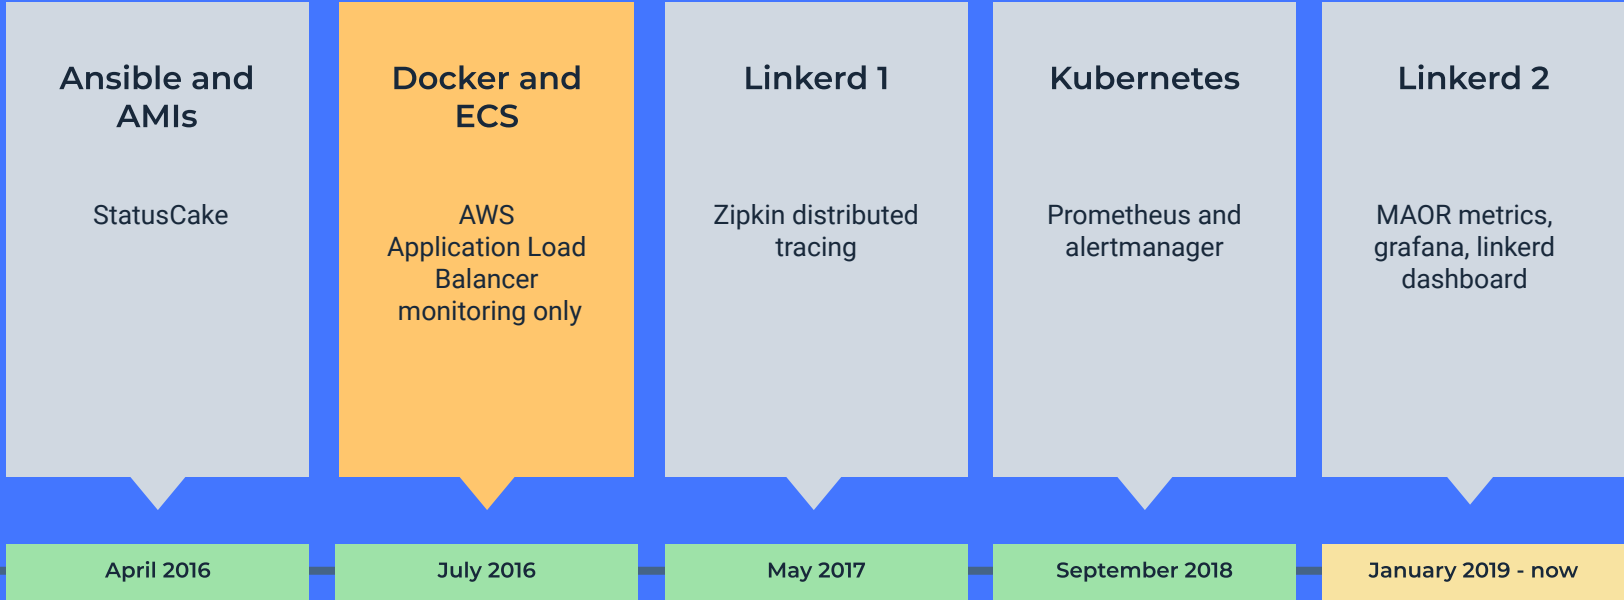

*“Exposing  
internal stats /  
metrics for  
debugging”*

```
apiVersion: linkerd.io/v1alpha1
kind: ServiceProfile
metadata:
  annotations:
    name: phone-verification.default.svc.cluster.local
    namespace: default
spec:
  routes:
    - condition:
        method: POST
        pathRegex: /verification
        name: POST /verification
        responseClasses:
          - condition:
              status:
                min: 409
              isFailure: false
        timeout: 100ms
    - condition:
        method: GET
        pathRegex: /verification/\d+
        name: GET /verification/{code}
        responseClasses:
          - condition:
              any:
                - status:
                    min: 404
                - status:
                    min: 401
              isFailure: false
        timeout: 50ms
```

Linkerd1	Linkerd2
Scala (JVM based)	Go & Rust
Once per node	Once per pod
Config applies to all requests	Config applies to specific routes
Config lives globally	Config lives with each application repo
TLS between nodes	TLS between pods
Application requires knowledge	App is totally oblivious

demo

ATTEST

# Linkerd2

- Reduce operational load for feature teams
- Customised to each specific app; solving out-of-service problem
- Dashboard surfaces “detailed what”, getting closer to the “why”
- Slack channel is huge resource, great community
- But:
  - ◆ Only k8s
  - ◆ Needs control plane

# Hiring!
